DATA SHEET

Part Number: **P4040-126**

Description: **Iron Powder Plain Core**

Dimensions:	inches (millimeters)	
Outside Diameter:	0.625 / 0.620	(15.88 / 15.75)
Length:	1.265 / 1.235	(32.13 / 31.37)

Material Characteristics:

Material Type:	Micrometals Mix-26
μ_i (reference)	75 (reference)
Temperature Stability	+825ppm/K typical

Finish: **None**

Note: Core surface will rust if exposed to high humidity and rain or not handled with cotton gloves. The Thermal Aging properties of Micrometals Mix -26 are unique to Micrometals alone and not our competitors. Other material properties as described in Micrometals Iron Powder Products Catalog. Micrometals Powder Cores comply with the EU Directives 2002/95/EC and 2003/11/EC. Any possible unintentional RoHS trace elements present are less than 100 ppm.
